

CLARK COLLEGE – LC PROGRAM ASSESSMENT

STATEMENT OF RESEARCH METHODS

As for an assessment plan, I know we have work to do to make it comprehensive, but we are already planning on a few basic things:

We will track course success, retention, and eventually completion rates for participants in learning communities, and compare them to their non-participant counterparts. For HDEV 102/COLL 101 specifically, we have an existing quarterly learning outcomes assessment in place, as well as a quarterly feedback survey. These are just the bare-bones basics... we have much more to plan, but this is where we are now.
