

CHEM 101

Water Contents:

Now that you know how to name substances, you will be making a list of what the authorities test for in your water supply, as well as the legal allowable level of that substance. There are 2 supplies: tap water and drinking water.

You are assigned to research: _____ **Water**

Goal: To determine what substances are in your household tap water or drinking water.

What do “they” test for: They meaning the governing authority that is responsible for the safety of your water. This could be the EPA, or the local water treatment plant.

Water Type	Location/ Brand	Source	Authorty that regulates source
EX: Bottle	Arrowhead	?	FDA?
EX: Tap	Menifee	grd water	eastern municipal water district

Substance	Legal Limit/ currently tested

****note some substance are not tested for and therefore do not have a legal limit!!!!!!***
